

# PremiumGrades

20 Free After Effects Presets

# Getting Started

## Download and Install Presets

To download PremiumGrades, simply visit the download page on Premiumbeat.com. If you are reading this, then odds are you've probably already completed this step. If not, navigate to the corresponding blog post and click the download link near the bottom of the post..

Your files will download as a .zip file, simply unzip and you will see a folder titled 'PremiumGrades'. Copy the folder 'PremiumGrades' to the Presets folder in your Adobe After Effects applications folder. The next time you open After Effects you should see the effects presets in your Effects/Presets panel if you navigate to Animation Presets>PremiumGrades The presets are named based on the essence in which they give off, but you could change the names in the 'Presets' folder.

## Using the Presets

To apply an effects preset to your composition simply drag and drop it onto your footage in the After Effects timeline. If you want to apply the preset to your entire composition you can either create a new adjustment layer and drag the effect preset onto the adjustment layer or precompose the entire composition and apply the effects preset to the new composition.

*Note: You may use the presets in any way, but please do not distribute the effects presets without written approval from PremiumBeat.com*
